BV-TAN C

1. BV-TAN C

BV-TAN C, is a mix of modified valonea extract with vegetable tannins and auxiliary agents. The product is developed for multipurpose use in leather tanning and retanning. It is an universal retanning agent for all types of leather i.e. upholstery, shoe upper, garment and etc. It can also be used in sole leather tanning in order to achieve restricted adstrigency with lighter color. It has enhanced solubility and increased penetration properties. The product gives increased levelness on leather grain. BV-TAN C gives light colored, firm but also flexible leathers with high light fastness.
