BV-TAN M

1. BV-TAN M

BV-TAN M, is a modified valonea extract. The product has enhanced solubility and increased penetration properties. It also helps penetration of accompanying tannins. All these specifications are fulfilled without losing much from its tanning powder. It does not cause coarse grain due to high astringency. BV-TAN M gives lighter coloured leathers than natural valonea tannin and it has high light fastness.

BV-TAN M can be easily used in the initial stages of vegetable tannages and all kinds of retannages. It can be used alone or with other vegetable tannins in production of sole leathers as well as in retannage of upper, upholstery and other types of leathers requiring efficient filling of empty regions.

2. PROPERTIES

Specifications according to filter method

Tannins	(%)	: 73 ± 1.0
Moisture	(%)	: 5 ± 2.0
