BV-TAN NIST

1. BV-TAN LIST

BV-TAN NIST is a mix of vegetable tannins with auxiliary agents. The product is beige coloured and it is especially developed for production of a little firmer and light coloured vegetable leather types i.e. automobile or furniture upholstery and upper leathers. The leathers tanned with BV-TAN NIST have similar properties like BV-TAN LIST except giving a little stiff and firm leather properties. The products have very high light fastness.

BV-TAN NIST can also be used in retannage of all kinds of leathers for obtaining even fullness with good buffing and print retention properties. Additionally BV-TAN NIST can be used proportionally at the end of sole leather tannage in order to lighten the colour and to give elasticity to the product.

2. PROPERTIES

Specifications according to filter method

Tannins	(%)	: 62 ± 1.0
Moisture	(%)	: 5 ± 2.0
Non-Tannin	(%)	: 28 ± 1.0
Insolubles	(%)	: 5 ± 1.0
pH		: 3.7 ± 0.1

3-SECURITY and PRESERVE
