BV-TAN S

1. BV-TAN S

BV-TAN S is sulphited valonea extract. Its adstringency is reduced by sulphitation in order to obtain better penetration in to the hide/skin. The product is especially developed to be used in initial stages of heavy / light leather tanning. It is also used in retannage of all kinds of leathers (i.e. shoe upper, lining, upholstery, suede, nubuck and split leathers) requiring improved filling, buffing and printing properties. The product has excellent solubility within water. It has lighter color than natural valonea extract (BV-TAN N) with high light fastness.

2. PROPERTIES

Specifications according to filter method

Tannins	(%)	: 61 ± 1.0
Moisture	(%)	: 5 ± 2.0
Non-Tannin	(%)	: 32 ± 1.0
