BV-TAN SL

1. BV-TAN SL

BV-TAN SL is light sulphited valonea extract. Its adstringency is gradually reduced by light sulphitation in order to obtain better penetration in to the hide/skin. It has stronger tanning ability than BV-TAN S. The product is especially developed to be used in initial and/or following stages of heavy / light leather tanning either alone or accompanying with other vegetable tannins. It is also used in retannage of all kinds of leathers (i.e. sole, shoe upper, lining, upholstery, suede, nubuck and split leathers) requiring improved filling, buffing and printing properties. The product has good solubility within water. It has lighter color than natural valonea extract (BV-TAN N) with high light fastness.

2. PROPERTIES

Specifications according to filter method

Tannins	(%)	: 65 ± 1.0
Moisture	(%)	: 5 ± 2.0
Non-Tannin	(%)	: 28 ± 1.0
Insolubles	(%)	: 2 ± 0.5
pH		: 4.1 ± 0.1

3-SECURITY and PRESERVE

- BV-TAN SL has no flaming, explosive feature
- Store away from moisture.
- BV-TAN SL must not contact with iron powder as with other vegetable tannins.
- The product remains unaltered for a long time in its package under appropriate conditions.
